

UNDERGROUND GARAGE WEIHBURGGASSE

THE PROBLEM

- limited availability of parking space around this area
- a chronically occupied garage of the close-by hotel Marriott
- no area for the construction of a “classical” underground garage

UNDERGROUND GARAGE WEIHBURGGASSE

THE SOLUTION

The first underground garage
under a street in Vienna!

UNDERGROUND GARAGE WEIHBURGASSE

But first of all, we had to resolve all the problems which are entailed with a construction side in the city centre, like narrow building site, built-in components (gas, water, channel, electricity, long-distance heating etc.) and archaeological findings.

UNDERGROUND GARAGE WEIHBURGGASSE

Now the garage is situated next to the Ringstraße (the inner circular road) and between the famous hotels Marriott, Radisson SAS and Coburg in one of the most “overparked” areas of the Viennese city.

UNDERGROUND GARAGE WEIHBURGGASSE

This car park is characterized by its comprehensive comfort.

UNDERGROUND GARAGE WEIHBURGGASSE

With the dimension of 2,50 x 5,00 m we offer parking lots much wider than in most other garages.

We have relinquished wilfully to the maximization of the number of parking lots to be able to offer convenient parking.

UNDERGROUND GARAGE WEIHBURGGASSE

The garage is equipped with a single space administration. The visitor is informed by green or red indicators from a long distance about the next free parking lot.

This system is reducing the searching time for a free parking lot and therewith also the CO₂-emission.

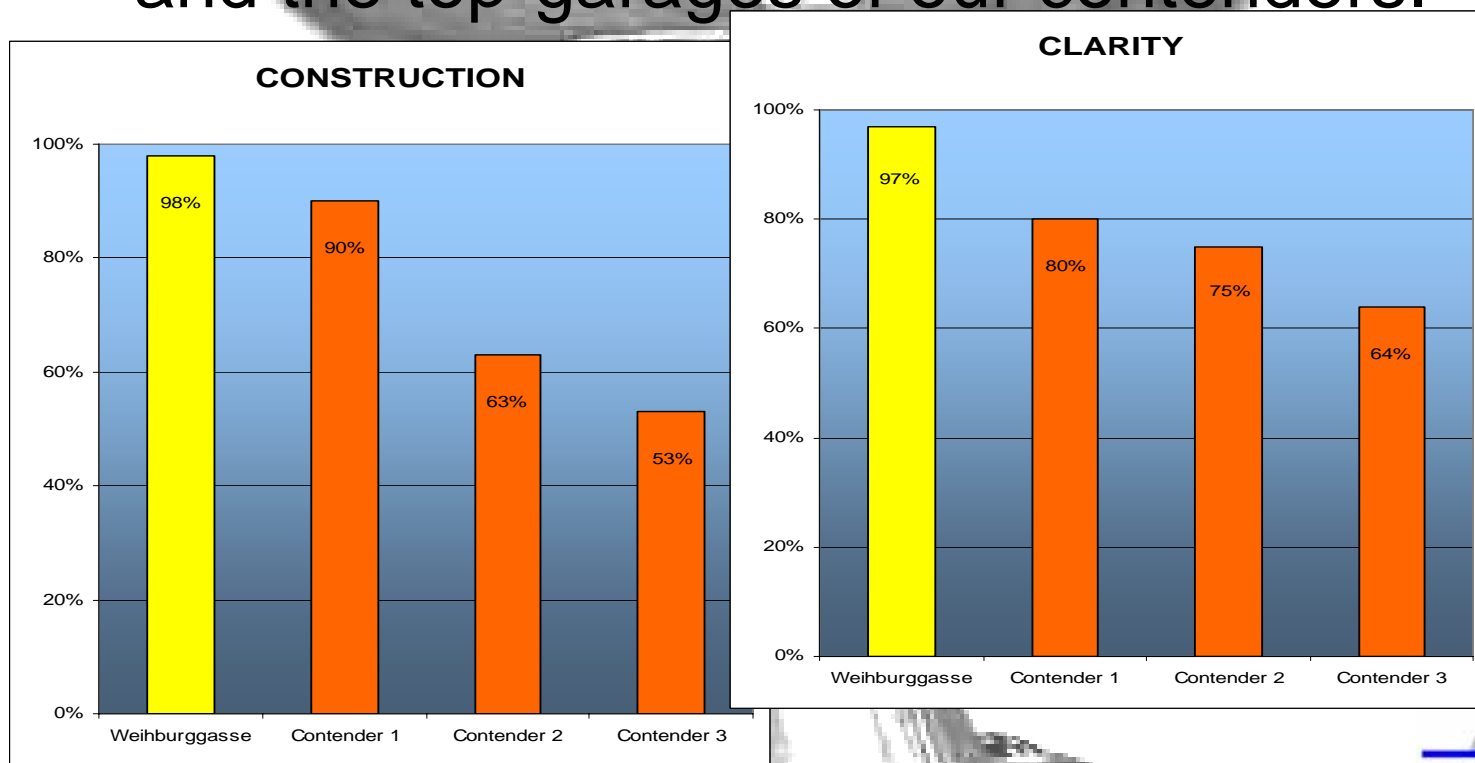

UNDERGROUND GARAGE WEIHBURGGASSE

Also the ambience of the garage doesn't correspond with those of other car parks.

So we copied true to scale the gate of the city wall, which was located in till the middle of the 19th century on this position, we depicted the nearby bridge over the moat in a 16 m long painting and we hung up boards with photos of the construction works.

UNDERGROUND GARAGE WEIHBURGASSE

That this garage is offering a top-convenience was also approved by independent testers, who have tested the underground garage Weihburgasse and the top-garages of our contenders.

UNDERGROUND GARAGE WEIHBURGASSE

EXECUTIVE SUMMARY:

No possibility for the construction of a conventional car-park – therefore the first underground-garage in Vienna under a street.

The result is one of the most comfortable underground-garages of Vienna with huge parking lots, an economical light-system which was awarded by the European Commission, a single space administration and a comfortable surrounding.
