

Q-Park Sauchiehall Street Glasgow, UK

EPA Award 2011
Renovated Structures

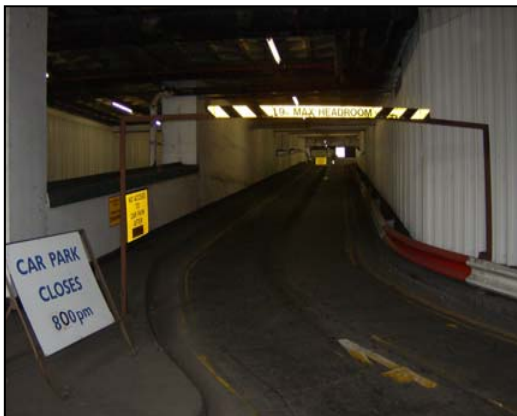

Description

- Prime city centre location
- Sauchiehall Street has 375 spaces and serves shoppers, leisure users and hotel customers
- The project's aim was to enhance customer perception and service delivery
- The original car park was built in the early 1970's
- The renovation project reduced the number of spaces from 404, demonstrating that customer service standards was the priority
- The car park remained operational throughout the renovation project

Identification and access

- Traffic lights direct drivers from the main road
- Speed gates at vehicle entrance/exit
- Secure pedestrian access
- Bright and welcoming entrance
