- Public/private partnership, until 2059
- Fonded by businesses in Lausanne

# INOVIL

## Renovation objectives

- Complete renovation while maintaining services
- Integration of a designer, collaboration with an engineer and an architect
- Integration of inovative solutions
- Technological updates (security, electrical, CO2, etc)
- Improve customer services
- Mobility hub
- Integration of « sustainable development »

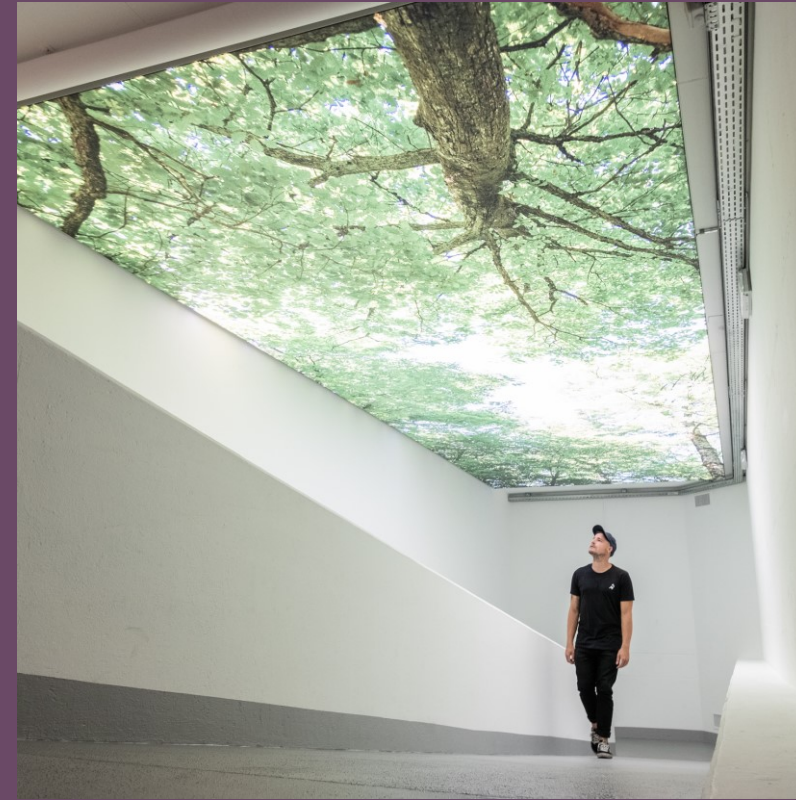

# INOVIL

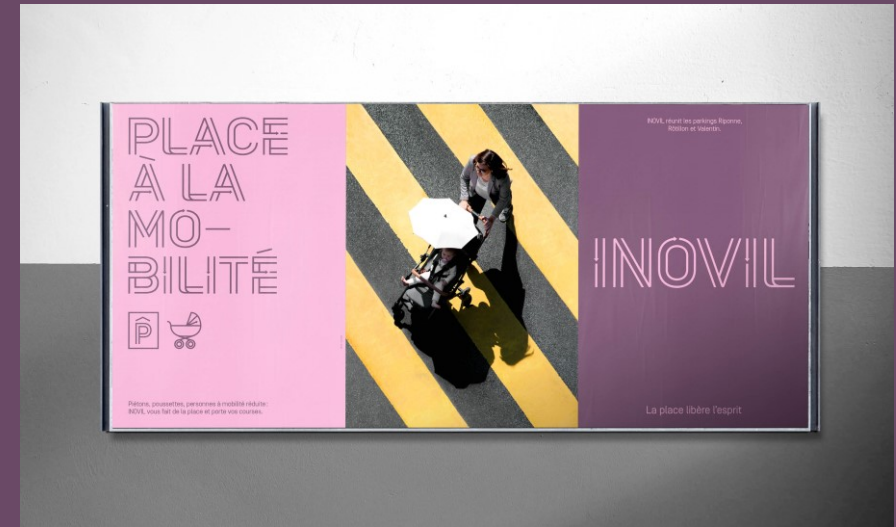

## What was improved : (Pollution)

- 4 high speed charging posts for electric cars
- LED lights throughout entire parking complex
- Floor renovation: paint and resin without solvent
- Camera scanning license plates reduces time waiting at entrance
- High maintenance level
- New signalization for vehicles as well as pedestrians.
- Widening and bevel of sidewalks and ramps at entrance, exit, and inside the parking.
- Reception renovation: creation of a proper reception for clients in a new lodge

## What was improved : [Subtanaible mobility]

- Mobility parking spots
- Bicycle parking area planned for 2021
- Mobility hub [City center with access to buses, metros, proximity to train station]

# INOVIL

## What was improved : [Urban public and private space allocation]

- Inovil-Colis : complementary delivery service in collaboration with commercial partners
- First 20 minutes inside parking free of charge to facilitate drop-offs
- Different daily fees for professional vehicles and deliveries

## What was improved : [ City center attractiveness]

- Complete renovation of wall facing city center square, improving aesthetic
- Underground parking 4 floors, only one wall visible from city center
- Attractive prices

Thank you  
for your  
attention
